

Global Currency & Foreign Exchange

Using international data and research information provided by Rabo Bank, students will work as a group to complete reports that provides information about International Trade Finance.

Classroom Activities May Include:

- ★ Selecting a foreign country that is currently engaging in international trade
- ★ Researching the currency used within the foreign country of choice
- ★ Calculating the current rate of exchange for U.S. dollars
- ★ Assessing concerns and benefits of the currency of the foreign country of choice for U.S. business

Aligns with the CGBP Skill Set: International Trade Finance

International trade finance assesses political and economic risks for global commerce, evaluates currency exchange rates, researches customer credit history and payment capacity, understands insurance methods to ensure timely payments while mitigating risk, as well as financing opportunities if needed for extended terms.
